

Dear Investor/Analyst/Shareholder,

Thank you for your support for Phison (8299TT). Please see the details of our June 2022 revenue below:

Phison Electronics (8299TT), a leading manufacturer of NAND controllers and NAND storage solutions, announced today (7/8) its operating results for June 2022, with consolidated revenue of NT\$5.284 billion, an annual growth rate of 3% (YoY), a record high for the same period in a single month. The annual cumulative revenue reached NT\$33.391 billion in June, with an annual growth rate of 16% (YoY), a new high for the same period.

PHISON 8299TT	Sales Revenue (NT\$bn)	YoY	Remarks
June 2022	5.284	3 %	Record high for the same period
Jan. to June 2022	33.391	16 %	Record high for the same period

Compared with the same period last year (YoY), the total shipments of SATA and PCIe SSD controllers in June increased by nearly 3%, and the total shipments of industrial-grade controllers increased by nearly 103%, continuing to grow steadily. In addition, the total shipments of PCIe SSD controllers from the year to June increased by over 36% year-on-year, and the total memory bits shipments (Total Bits) also increased by nearly 3%, both hitting new highs for the same period in history.

PHISON June 2022 Business Highlights	YoY	Remark
Total shipments of SATA and PCIe SSD controller	3 %	
Total shipments of industrial-grade controller	103 %	
Jan. to June 2022 of total shipments of PCIe SSD controller	36 %	Record high over the same period
Jan. to June 2022 of total NAND shipments (Total Bits)	3 %	Record high over the same period

K.S.Pua, CEO of Phison, explained that during the past two years, the epidemic has led to changes in people's life and work patterns, and various electronics industries have experienced substantial demand growth, including desktop computers, notebooks, tablets, smart phones, cloud servers, and game consoles, etc. As a result, the world has ushered in a super boom in the semiconductor industry. However, this prosperity was also reversed due to factors such as regional lockdowns, war uncertainty, rising oil prices, and inflation, and eventually became a global decline in consumer demand.

K.S.Pua went on to emphasize that Phison has always been accustomed to market fluctuations in supply and demand. For Phison, the only constant in the market is "change";

in other words, the market will not always be in a tailwind or a permanent recession. As the CEO of Phison, the most important thing is how to ride the wind and waves in the ever-changing market, lead the company and team to overcome difficulties, and continue to pursue growth and prosperity in stability. Looking forward to the future, although there are still many uncertainties, I believe that with the joint efforts of the Phison team, we will continue to work closely with global partners and customers to stand firm and create common prosperity.

### [PHISON's Quick Facts]

- Over 20 years experiences in NAND controller IC design and module integration.
- Over 3,400 employees globally, and more than 70% are engineers.
- Nearly 2,000 memory-related patents globally.
- Target long-term revenue of over NT\$100 billion through the 5+5 growth strategy
- Exceeds 20% of the global market share of SSD controllers
- US\$2.23B sales revenue in 2021.
- [Unique business model](#) that can produce consistently strong cashflow and profits over long-term NAND memory market cycles.
- Committed to maintaining long-term partnerships with our global NAND flash supply sources and with our downstream module customers

### [About PHISON]

Phison Electronics Corp. (TPEX:8299) is a global leader in NAND Flash controller IC and storage solutions. We provide a variety of services from controller design, system integration, IP licensing to total turnkey solutions, covering applications across SSD (PCIe/SATA/PATA), eMMC, UFS, SD and USB interfaces, reaching out to consumer, industrial and enterprise markets. As an active member of industry associations, Phison is on the Board of Directors for SDA, ONFI, UFSA and a contributor for JEDEC, PCI-SIG, MIPI, NVMe and IEEE-SA.
