

Dear Investor/Analyst/Shareholder,

Thank you for your support for Phison (8299TT). Please see the details of our December 2022 revenue below:

Phison Electronics (8299TT), a leading provider of NAND controllers and NAND storage solutions, announced today (1/10) its operating results for December 2022, with consolidated revenue of NT\$4.002 billion, a monthly growth of -1.9% (MoM). The annual revenue in 2022 reached NT\$60.256 billion, with an annual growth rate of -3% (YoY), the second highest in history.

<b>PHISON 8299TT</b>	<b>Sales Revenue (NT\$bn)</b>	<b>Growth Rate</b>	<b>Remarks</b>
December 2022	4.002	-1.9 % MoM	
2022 Annual Revenue	60.256	-3 % YoY	Second highest in history

Compared with the same period last year (YoY), the total shipments of PCIe SSD controllers increased by more than 60% in December, and the total shipments of industrial-grade controllers also increased by 11%. In addition, based on the cumulative total shipments in 2022, the total shipments of PCIe SSD controllers have an annual growth rate of more than 14%, and the total shipments of industrial-grade controllers have an annual growth rate of nearly 33%, both of which set new historical highs for the same period.

<b>PHISON December 2022 Business Highlights</b>	<b>YoY</b>	<b>Remark</b>
Total shipments of PCIe SSD controllers	60 %	
Total shipments of industrial-grade controllers	11 %	
Cumulative total shipments of PCIe SSD controllers in 2022	14 %	Record high over the same period
Cumulative total shipments of industrial-grade controllers in 2022	33 %	Record high over the same period

K.S.Pua, CEO of Phison, explained that 2022 is a year full of challenges. From the epidemic, inflation, war, oil prices, energy, etc., the storage application demand market has been affected to varying degrees. In such an unstable market period, Phison's ability to maintain a relatively stable annual revenue represents the continuous positive results of Phison's transformation and technological leadership.

K.S.Pua went on to emphasize that the international situation in recent years has been volatile and is beyond everyone's control. However, for Phison, it is a good time to present the latest technologies and muscles. Through the just-held 2023 CES Show in the United States, [Phison showcased PCIe 5.0 high-speed](#)

[transmission and storage solutions](#), including the latest flagship PCIe 5.0 SSD controller PS5026-E26 storage solution, which also [successfully helped brand customers to be awarded the best product of CES by a well-known American review website-Tom's Hardware](#). It is expected that these successful cooperation cases will have positive benefits for the future growth of Phison. Looking forward to 2023, Phison will continue to work closely with customers around the world to jointly create new-generation storage solutions and applications, and proactively stimulate storage market demand and seize business opportunities.

### **[PHISON's Quick Facts]**

- Over 22 years experiences in NAND controller IC design and module integration.
- Over 3,500 employees globally, and more than 70% are engineers.
- Nearly 2,000 memory-related patents globally.
- Target long-term revenue of over NT\$100 billion through the 5+5 growth strategy
- Exceeds 20% of the global market share of SSD controllers
- NT\$60.256B sales revenue in 2022.
- [Unique business model](#) that can produce consistently strong cashflow and profits over long-term NAND memory market cycles.
- Committed to maintaining long-term partnerships with our global NAND flash supply sources and with our downstream module customers

### **[About PHISON]**

Phison Electronics Corp. (TPEX:8299) is a global leader in NAND Flash controller IC and storage solutions. We provide a variety of services from controller design, system integration, IP licensing to total turnkey solutions, covering applications across SSD (PCIe/SATA/PATA), eMMC, UFS, SD and USB interfaces, reaching out to consumer, industrial and enterprise markets. As an active member of industry associations, Phison is on the Board of Directors for SDA, ONFI, UFSA and a contributor for JEDEC, PCI-SIG, MIPI, NVMe and IEEE-SA.
